Summary

A results-oriented software engineer with extensive experience in leading the development and optimization of enterprise-grade applications. I specialize in designing scalable solutions, modernizing legacy systems, and ensuring high availability and performance for critical business systems.

With expertise in C#, .NET, MS SQL, TypeScript, and Node.js, I have spearheaded projects that drive operational efficiency and scalability. Notable achievements include leading the Honda Connect App (focused on data transfer objects), Honda Smart Device App migrations, and the Technician App for Honda Indonesia, where I architected robust data processing pipelines, optimized monolithic applications, and collaborated with cross-functional teams to deliver impactful solutions.

Highlights of my career include:

- Migrating legacy systems to modern .NET platforms, reducing operational risks and enhancing scalability.
- Managing the full lifecycle of flagship projects to align with business objectives and user needs.
- Conducting performance tuning for database systems to efficiently handle large-scale data operations.

Driven by curiosity and innovation, I am passionate about leveraging my skills to solve complex challenges and deliver value through technology. I look forward to contributing to impactful projects and collaborating with like-minded professionals to shape the future of software development.

Experience

Open Hero Labs

Co-Founder

August 2024 - Present (1 year 4 months)

Jakarta, Indonesia

Founded by three idealists, Open Hero Labs was born out of a desire to contribute to the intersection of technology and business acceleration. We specialize in discreet, high-impact projects for clients who need to grow their ventures without the public spotlight. Our expertise has since expanded to a full suite of services, including consulting, digital acceleration, private equity, and strategic business pivoting—all designed to help businesses navigate change and achieve sustainable growth.

Honda Prospect Motor

4 years 2 months

Senior Programmer

February 2024 - Present (1 year 10 months)

Jakarta, Indonesia

- Spearheaded the development and optimization of monolithic applications for enterprise systems, ensuring high availability and performance.
- Led the migration of legacy applications to modern .NET platforms, reducing operational risks and enhancing system scalability.
- Architected robust data processing and integration pipelines to streamline workflows across multiple systems.
- Collaborated with cross-functional teams to implement scalable solutions for Honda Smart Device systems.
- Designed and developed custom applications using .NET and Xamarin, ensuring compatibility across platforms.
- Conducted performance tuning for database systems to support large-scale data handling.
- Managed the end-to-end lifecycle of AO Project, a flagship software initiative aimed at improving operational efficiency for automotive solutions.

IT Application & Development

October 2021 - February 2024 (2 years 5 months)

Jakarta, Indonesia

I am a passionate Junior Developer with hands-on experience in the .NET stack, where I contribute to building and maintaining monolithic applications. My role includes:

Application Development: Working on full-stack development tasks, focusing on creating and enhancing features for various applications.

Maintenance & Migration: Assisting in the maintenance of existing applications and supporting migration projects to ensure smooth transitions and system upgrades.

Data Processing: Implementing solutions for efficient data processing and management to support business needs.

Project Highlights:

Honda Smart Device: Contributed to the development of an application used by sales teams across Indonesia, optimizing its functionality and reliability for dealer operations.

Honda Connect: Gained valuable experience working on automotive connectivity technology, helping to improve the integration and user experience for Honda customers.

With a solid foundation in software development, I am dedicated to growing my skills and contributing effectively to innovative projects.

GIJOEFIX

Co-Founder

May 2019 - March 2021 (1 year 11 months)

Greater Jakarta Area, Indonesia

Here I created a service where everyone can service their gadgets anywhere and anytime, but because of the difficulty of competition and small capital, we decided to shutdown this business as of March 2021.

Traders Family

2 years 1 month

Frontend Web Developer

February 2019 - May 2019 (4 months)

Jakarta

I learned to make landing pages based on user needs. Creating a landing page is very fun because I have to explore various design sources so that the landing page I make is interesting.

Video Production Specialist

November 2017 - February 2019 (1 year 4 months)

Greater Jakarta Area, Indonesia

The process that I run is planning, editing, color grading, and also the process of delivering to social media so that the videos that are made can produce conversions.

Digital Marketing

May 2017 - November 2017 (7 months)

A Digital Marketing, or specialist, is often responsible for developing the strategy used in marketing a company's product online, utilizing such techniques in the field as social media, Web analytics, e-mail marketing and search engine optimization, among others.

Bogor Agricultural University

On The Job Training

January 2015 - May 2015 (5 months)

Research about Raspberry Pi for communication in Bogor Agricultural University building.

Education

Universitas Bunda Mulia

Bachelor of Technology - BTech, Information Technology · (2016 - 2020)
